

### Reflections

Reflection	<p>The size does not change, but the shape is <b>'flipped'</b> like in a <b>mirror</b>.</p> <p>Line <math>x = ?</math> is a <b>vertical line</b>.                      Line <math>y = ?</math> is a <b>horizontal line</b>.                      Line <math>y = x</math> is a <b>diagonal line</b>.</p>	<p>Reflect shape C in the line <math>y = x</math></p>
------------	---	---

### Rotations

Rotation	<p>The size does not change, but the <b>shape is turned around a point</b>.</p> <p>Use tracing paper.</p>	<p>Rotate Shape A 90° anti-clockwise about (0,1)</p>
----------	---	--

### Translations

Translation	<p><b>Translate</b> means to <b>move a shape</b>.                      The shape does not change <b>size</b> or <b>orientation</b>.</p>	
Column Vector	<p>In a column vector, the <b>top</b> number moves <b>left (-)</b> or <b>right (+)</b> and the <b>bottom</b> number moves <b>up (+)</b> or <b>down (-)</b></p>	<p><math>\begin{pmatrix} 2 \\ 3 \end{pmatrix}</math> means '2 right, 3 up'  <math>\begin{pmatrix} -1 \\ -5 \end{pmatrix}</math> means '1 left, 5 down'</p>

### Describing Transformations

Describing Transformations	<p>Give the following information when describing each transformation:</p> <p>Look at the number of marks in the question for a hint of how many pieces of information are needed.</p> <p>If you are asked to describe a 'transformation', you need to say the <b>name of the type of transformation</b> as well as the other details.</p>	<ul style="list-style-type: none"> <li>- <b>Translation, Vector</b></li> <li>- <b>Rotation, Direction, Angle, Centre</b></li> <li>- <b>Reflection, Equation of mirror line</b></li> <li>- <b>Enlargement, Scale factor, Centre of enlargement</b></li> </ul>
----------------------------	--	--
